Dear Sava,

I have had the privilege of using MRX Solutions' Chartmaster software since its early beta-testing stages. Over the years, I have been constantly impressed both by the constant improvements you and your MRX team have made to the program, and more importantly by your willingness to adapt and customize the software for my use. I currently work in a clinic with 2 practitioners that have very different charting styles. The flexibility of the Chartmaster program has enabled both of us to chart quickly and easily in a way that suits our individual preferences and styles.

Adapting the Chartmaster system has also enabled our office to go virtually paperless, and has made time consuming tasks such as providing clinical copies less onerous for my staff. The program is simple enough that both the practitioners and the staff adapted to it very quickly.

I would highly recommend the Chartmaster program to anyone who is considering switching to electronic medical records.

Sincerely,

Dr. Debbie Wright  
Chiropractor
